

2010 was a difficult year as we navigated our way through the many challenges of the economic recession. We are proud to have worked in a collaborative manner with our fire department and city leaders in an effort to reduce projected budget deficits while maintaining a high degree of customer service and firefighter safety. Regardless of how tough the times are, we continue to reach out to those in need. Members of the CFA have provided loving support to individuals such as Lindsey, DJ, Taryn, Daylon, Valerie and their families as these kids continue to fight for their lives.

Our annual Auto Extrication seminar/fundraiser was once again a huge success. With the monies raised from this event and the substantial donation received from Lucas Oil, we were able to support so many people and other non profit organizations and charities within our community.

Corona citizens kicked in a ton of money during the three "Fill the Boot" fundraisers we held. Their financial support allowed several local children to attend "Camp Beyond the Scars", a special burn camp for kids, as well as a fun trip to Disneyland with Corona Firefighters. Additional donations went to support the fight against cancer through our participation in the annual "Relay for Life" cancer walk. And once again, our community pulled together by donating thousands of toys to our fire stations that were distributed to those less fortunate during our annual "Spark of Love Toy Drive". Association members brought smiles to dozens of adopted families over the holidays and worked hard as camp counselors and mentors for several children who have suffered burn injuries. We are saddened to announce the passing of two of our retired brothers this past year. Engineer Dave Reed and Captain Bill Perkins were laid to rest but our memories of them live on.

~ May God bless each of you in 2011.
